Cycling room
Weight and cardio equipment
Men's and women's locker rooms
Basketball /volleyball court
3 racquetball courts
2nd floor lounge space

The 69,440 gross square foot recreation center at California Baptist University (CBU) in Riverside, California designed by KTGY, is a two-story state-of-the-art recreation center that features an innovative rock climbing wall plus a changeable court space that allows for two intramural basketball courts, a collegiate basketball court or three volleyball courts. In addition, the space includes lounge areas, three racquetball courts, weight room, fitness rooms, men's and women's locker rooms and a cheerleading practice space. KTGY's innovative green design includes a useable roof top with a soccer field and a running track covered with synthetic turf. The green roof helps cool the building and reduces the building's carbon footprint.
