Keith McCloskey is an Associate Principal for KTGY's Los Angeles office. He is responsible for establishing the overall design vision for all of the office's new architecture and interiors projects and leads a creative team that is involved in a broad range of projects from low density to high-rise throughout the U.S.

Mr. McCloskey's comprehensive experience spans nearly 20 years and includes the planning and design of multi-family, mixed use, senior living, civic and aviation projects. His most recent work has been focused on high-density urban infill sites, which provide challenging design opportunities in politically-charged, design-sensitive communities. He is particularly adept at creating sustainable projects that integrate into the urban fabric, generating a sense of place and individual character of each community. These residential projects range from affordable and tax credit housing to luxury apartment and condominium communities.

Mr. McCloskey has taken a keen interest in Sustainable Architecture since early in his career and became a LEED Accredited Professional shortly after the program's inception over a decade ago. His work integrates green building design principles into each project, and as a result he has worked on multiple projects from their design inception through final certification. He has a passion for researching new technologies and building systems, and recently completed one of the largest intensive Eco-Roof installations on an apartment community in Portland, Oregon.

In addition to leading the Los Angeles office's design efforts, Mr. McCloskey has been actively involved in volunteer programs within the City of Los Angeles including AIA Los Angeles Design Competition Mentoring as well as the Architecture Construction & Engineering (ACE) Student Mentorship Program.
