Parking: 84 spaces (2 sp./unit)

Mason at Playa Vista provides single-level living within the highly desirable master-planned community of Playa Vista. The six-plex stacked flats feature an unconventional mix of modern and traditional architecture with a blend of brick and beachside accents, creating a unique coastal feel. Mason, tucked away against the bluffs, offers residents picturesque views enhanced by floor to ceiling windows in the expansive great room and private patios. Elevators located on the interior of the building serve two residences per floor, allowing a more private feel. Each unit has a private two-car garage with elevator access; plan three boasts ground floor entry and bedroom suite, ideal for guests or multi-generational families. Mason at Playa Vista offers residents stunning views, resident courtyards, public parks and access to shops, restaurants, entertainment and employment.
