Dawn Bridges brings 25+ years of experience in development, project management and implementation of technology environments for the design, construction and operation of large complex programs including public, private and federal projects to her role as director of technology at KTGY.

Ms. Bridges is a creative thinker specializing in leading technology teams and managing a diverse portfolio of technologies that supports revenue growth, streamlining information sharing and workflows, improving productivity and fostering the organization's success.

In her role Ms. Bridges is engaged with technology and business strategy and ensure that the company has the best technology for the job(s) at hand. Ultimately keeping the company at the leading edge of technologies with the insight, experience and understanding to successfully apply these technologies to the organization's ongoing operations.

Ms. Bridges is always looking at disruptive technologies coming to market in various industries and for opportunities to apply these while ensuring that the mid to long term technology direction is flexible enough to adapt and adhere to the exponentially changing world and industry needs.

"As we move forward with the integration of our practice and project delivery methods, technology is a key enabler and boundary breaker for our business. To be successful we must be cognizant of the synergies, risks and oppositions of our technological direction."
